

Tenax GP Flex for Green Space Parking

LOCATION: Castle Hill Cider, 6065 Turkey Sag Road, Keswick, VA 22947

PRODUCT: GP Flex 1800

PROJECT: Installation of extruded mesh for protection of grassed areas from vehicle traffic

THE PROBLEM

Castle Hill built a brand new cidery on site. Though this was a wonderful addition, the site was now left with insufficient parking for the increase of visitors to this cidery and tasting room nearby.

THE SOLUTION

After discovering Tenax's GP Flex 1800 grass protection mesh, the cidery purchased 36 rolls from their local distributor. Their resourceful staff was able to efficiently install the rolls with a minimal amount of tools required.

OTHER APPLICATIONS

Other applications for Tenax GP Flex include the stabilization of walkways for pedestrian traffic and the creation of access roads for vehicles and wheelchairs (ADA Compliant).

THE CONCLUSION

As a result, Castle Hill Cider was able to add 15,919.2 square feet (just over 1/3 of an acre) of permanent visitor parking for their new cidery and tasting room.

Castle Hill was the home of Colonel Thomas Walker, guardian and mentor to Thomas Jefferson. Today, Castle Hill reclaims its glory as a cidery and premier venue for weddings and special events in Virginia.
